School of Materials Science and Engineering

Seminar Topic: 
Writing a World Class Research Paper

Dr Ai Lin Chun
CEO, Founder
Science Storylab

Abstract

Writing a research paper should not be painful and daunting. Come and learn how to write one effectively. We will discuss the key components of your scientific story and how to write them precisely and concisely. Learn some of the best practices in scientific writing and hear recommendations on how to prepare a world class paper for publication.

Biography

Dr Ai Lin Chun received her B.Sc in Chemistry from the University of San Francisco in 2001 and Ph.D. in Biomedical Engineering from Purdue University in 2006. Her research focused on improving adhesion of orthopaedic implant materials to bone tissue. In 2006, she joined Nature Research (a division of SpringerNature) as one of the founding editors of Nature Nanotechnology. She was responsible for all the biomedical content on the journal, handling papers in the areas of nanomedicine, biomaterials, environmental, health and safety issues surrounding nanotechnology. She has commissioned, edited, and written numerous articles and editorials for the journal. Between 2014 and 2016, Ai Lin was elected to be a member of the World Economic Forum, Global Agenda Council for Nanotechnology, where she joined a team of experts providing scientific intelligence on nanotechnology at the Forum. In 2017, she launched her own editorial services company, Science Storylab, to share her experience and knowledge in scientific research, publishing, and communication.

Wednesday, 21 March 2018 | Time: 9:15 am – 10:45 am | Venue: Lecture Theatre 8
Hosted by: Professor Chen Xiaodong
